## **OSSI-COEBMS**

# CENTRE OF EXCELLENCE IN BARIATRIC & METABOLIC SURGERY

# OBESITY & METABOLIC SURGERY SOCIETY OF INDIA (OSSI) - CENTER OF EXCELLENCE IN BARIATRIC & METABOLIC SURGERY (COEBMS)

The Center of Excellence in Bariatric & Metabolic Surgery program is an OSSI initiative aimed at Indian national patient safety and quality improvement available to all bariatric surgeons and facilities across the nation. The COEBMS program reflects the specific needs of obese patients and the unique roles and responsibilities of bariatric and metabolic surgery providers.

Safe patient care is the result of both the individual surgeon and the facility where the surgery is performed. The COEBMS certification is therefore awarded to a facility and its associated surgeons who have successfully completed the designation process, which enables patients to distinguish providers who have met the state-of-the-art requirements with regards to volume, manpower and facility for delivering high-quality perioperative and long-term follow-up care.

## **BENEFITS**

- 1.Ensure patient safety
- **2.**Improve the quality of the services offered by both Institutions and Surgeons
- 3. Ensure highly efficient and safe patient treatment
- **4.**Advise existing bariatric institutions to upgrade their status to level of excellence
- 5.A Registry that will guide our decisions and respond to challenges by our colleagues, insurance carriers, health care providers, governments and the public.
- 6. An invaluable resource for research.

# **PROGRAM REQUIREMENTS**

The primary requirement for applying to COE is that the applicant surgeon should be a member of OSSI for at least a period of 3 years at the time of application. The application facility should have a dedicated bariatric / metabolic surgery department functioning for at least a period of 12 months at the time of application. The department should also have entered their three years surgical data in to the registry by the time of inspection.

#### **SURGICAL EXPERIENCE**

The applicant surgeon / facility has performed at least 50 qualifying bariatric surgery procedures including restrictive, malabsorptive and revisional procedures in the preceding 12 months. Also, each applicant surgeon has performed at least 200 qualifying bariatric surgery procedures in their lifetime. All these procedures should have been entered in the OSSI Registry. Application failing to comply with the above clause will not be considered for COE.

Each applicant facility and surgeon should meet surgical outcomes benchmarks for mortalities, complications, readmissions and reoperations. More surgeons from the same facility can apply for Program Director if he / she satisfies the surgical experience requirement.

#### **Qualifying Procedures:**

The following procedures, whether open, laparoscopic, robotic qualify:

- Roux-en Y Gastric bypass (Banded or Non-banded):
- One anastomosis Gastric bypass (MiniGastric Bypass),
- Gastric banding
- Sleeve gastrectomy
- Biliopancreatic diversion with Duodenal Switch
- Ileal Interposition
- Duodeno-Jejunal Bypass
- Other published novel bariatric procedures

The following endoscopic procedures qualify:

- Endoscopic Balloon
- Endoscopic Sleeve Gastroplasty
- Novel Endoscopic procedures

The following revision procedures, whether open, laparoscopic, robotic or endoscopic also qualify when performed on bariatric surgery patients:

- Conversion to a procedure listed above
- Removal / Replacement of a slipped or eroded gastric band
- Altering the length of the bypass limb (Roux limb / Common channel)
- Band over a primary procedure
- Gastric pouch revision
- Reversal of gastric bypass, vertical banded gastroplasty, biliopancreatic diversion and duodenal switch procedures
- Re-sleeving for weight gain or sleeve dilation
- Endoscopic management including re-sleeve, pouch reduction, etc

#### **Outcomes Benchmarks:**

Applicant facilities and surgeons are required to meet the following outcomes benchmarks.

#### • Mortalities:

Overall mortality for all bariatric surgery procedures performed at the applicant facility: 0.2%-0.4% at 90 days

• **Complications**: ≤10% at 90 days (including major and minor)

Anastomotic leakage,

Bleeding requiring blood transfusion,

Pneumothorax,

DVT

Pulmonary embolism,

Respiratory failure,

Cardiac arrest,

Myocardial infarction,

Heart failure,

Liver failure,

Multi organ failure,

Renal failure,

Sepsis and SIRS.

#### Readmissions: ≤8% at 90 days

- Anemia
- Bleeding
- Dehydration
- Erosion
- Food intolerance
- Neurological complication
- Intestinal obstruction
- Band related complications
- Malnutrition and vitamin deficiencies

• Reoperations: ≤5% at 90 days

# **PROGRAMME DIRECTOR**

The applicant/ bariatric surgeon would be the Programme Director.

A minimum of four-member Bariatric coordination committee would need to be constituted with five of the following given members, where the surgeon and nutritionist will be the mandatory committee members. More than one bariatric surgeon can be be a part of the committee: Bariatric surgeon
Physician / Endocrinologist
Anesthetist
Nutritionist
Nursing Manager
Psychologist / Counsellor

The applicant holds interdisciplinary team meetings at least quarterly to ensure that decisions related to bariatric surgery are addressed in a comprehensive manner. The minutes of the meetings need to be recorded and uploaded which will be checked by the assessor. The Director would be primarily responsible for coordinating the interdisciplinary services and guidelines for bariatric surgery.

# **CONSULTATIVE SERVICES**

This would comprise of:

• Full time with 24 hour coverage

A Full time dedicated Anesthesiologist team who supervise anesthesia on all bariatric surgery patients.

A fully equipped Intensive Care Unit with a full time Critical Care Team (CCM) who manage the patient in the immediate postoperative period and during any sudden emergency, respiratory or cardiac arrest through its acute response team.

**Endocrinologist / Diabetologist,** or, at least one of which is available on-site at all times when patients are present, with an established protocol to follow for patients with metabolic syndromes

• On-site within 30 minutes of request;

**Gastroentrologist** capable of performing endoscopies to diagnose complications

**Interventional radiologist** or other physician capable of performing percutaneous drainage of intra-abdominal abscess.

**Integrated Physician** with critical care credentials to manage complications ( **Cardiologist or Pulmonologist**)

The facility is also able to identify the following consultative staff:

- Psychiatrist/Mental health provider
- Infectious disease specialist
- Emergency department
- Physiotherapy and Occupational therapy
- Ambulance services
- Full fledged in-house laboratory / blood storage

#### **EQUIPMENT AND INSTRUMENTS**

The facility has a full line of equipment and surgical instruments to provide appropriate perioperative care for bariatric surgery patients, including:

- Furniture in the OPD
- Body Composition Analyzer in OPD
- Wide wheelchairs to accommodate bariatric patients
- Blood pressure cuffs and Examination gowns
- Bariatric Inpatient beds
- Floor-mounted or Floor-supported toilets
- Availability of Crash Cart in the Recovery room and wards where the patients would be shifted in the postoperative period
- Specific Operating room tables to accommodate Bariatric patients
- Bariatric specific Surgical instruments
- Presence of Fibrotic laryngoscope / Bronchoscope in OR for difficult airways
- Personnel trained in the safe operation of the equipment and capable of moving patients without injury to the patient or themselves
- Radiologic capabilities like CT scan, MRI, Fluoroscopy / Dye study, etc.
  Centres without advanced radiological facility will need to provide
  document of MOU with an eligible outsourced facility with in 5 minute
  range from the COE along with dedicated ambulance services available
  in the premises.

# **SURGEON DEDICATION / QUALIFIED CALL COVERAGE**

The applicant facility should have policies and guidelines in place that require applicant / all eligible bariatric surgeons to have **qualified call** coverage, and the applicant surgeon certifies that each covering surgeon is capable of identifying and treating bariatric surgery complications.

The applicant surgeon spends a significant portion of his efforts in the field of bariatric surgery and completes continuing medical education. The applicant surgeon is a general/gastrointestinal surgeon by the highest certifying authority, is a member of **OSSI for at least 3 years**. The applicant surgeon has privileges as both a bariatric and general surgeon at the applicant facility. The application facility should have a dedicated department of bariatric and metabolic surgery under which all the protocols, guidelines and SOP's are functioning. The applicant facility also should have **Clinical Pathways** for each services provided.

#### STANDARDIZED OPERATING PROCEDURES

The applicant formally adopts and implements **clinical pathways** that facilitate the standardization of perioperative care for the relevant procedure:

- Preoperative multidisciplinary evaluation, education, preparation, admission workup/evaluation and informed consent of the bariatric surgery candidate.
- Anesthesia, including monitoring and airway management
- Perioperative care, including monitoring and airway management
- Deep vein thrombosis (DVT) prevention.
- Management protocols like Enhanced Recovery After Surgery (ERAS)
- Identification and evaluation of early warning signs of complications
- Preoperative, postoperative and long-term nutrition regimen.
- Pain management.
- Postoperative Follow up including entering data in the OSSI Registry.

#### **PATIENT EDUCATION**

The applicant provides organized and supervised **support groups** for all patients who may undergo or have undergone bariatric surgery on a regular basis. 24 hour helpline number to be provided for emergency calls and tele-consult / counselling services.

# **CONTINUING MEDICAL EDUCATION**

The applicant / facility would be committed to spread the science of safe Bariatric surgery. At least two courses/ CME'S would be conducted every year by the facility to impart teaching and training of surgeons in the field of Bariatric and Metabolic surgery.

# ONSITE INSPECTION FOR ACCREDITATION

The application for the accreditation will be filled online through official OSSI website <a href="www.theossi.com">www.theossi.com</a>. The application will be accompanied with an online payment to the OSSI account for a nonrefundable amount of Rs 100,000/= (One lakh only). Subsequent to receiving the fees OSSI COE committee will credential the application and if approved, will appoint **two assessors** for an onsite inspection. The cost of travelling and local hospitality for the assessors will be taken care by OSSI. Subsequent to the inspection, if the facility is approved, the accreditation will be valid for a period of 3 years.

Incase the assessors suggest certain changes/ modifications, the same would need to be completed in a period of one month by the applicant/ facility and proof would need to be submitted to the assessors for the final report.

Facilities already approved by the SRC as COE would be exempted from inspection and will be given the accreditation after applying online along with the payment of nonrefundable fees of Rs 100,000/= (One lakh only). However, the application will still be credentialed by OSSI COE committee before approving the COE for these centres.

Revalidation of the applicant/ facility will take place after three years. Revalidation nonrefundable fees of Rs 100,000/=(One lakh only) is to be submitted with online payment to the 'OSSI' account. An onsite inspection of the facility by a **single assessor will be done.** The cost of travelling and local hospitality for the assessor will be borne by OSSI.

## **MISCELLANEOUS**

- 1. If the Programme Director leaves the facility, it would cease to exist as "Centre Of Excellence". A fresh application with a new Programme Director with all required documentation would be needed to reapply and meet the desired criteria.
- 2. If the Program Director moves to a new facility, and the facility already was performing 50 surgeries in the preceding 12 months and fulfil all criteria, is eligible for immediate accreditation. If the centre is starting bariatric program afresh, then the Program Director need to produce 12 month data of > 50 surgeries to be eligible for COE application.
- 3. In case the surgeon practises in multiple institutes, he / she will apply for COE through the hospital where the maximum surgeries happen and also fulfils all the requirements for COE accreditation.

#### **CERTIFICATION**

The certification would carry the:

- Seal of the Centre of Excellence
- Name of the Facility
- Name of the Programme Director
- Duration of the certification
