Present Work

My designation is Senior Director-Max Institute of Laparoscopic, Endoscopic & Bariatric Surgery. I am a Senior Consultant surgeon, and have been working in a group practice

of five distinguished surgeons for the past 23 years. Our Institute is part of a premier Tertiary care super specialty hospital in the capital of India, New Delhi. We provide state-of-the-art surgical care and have been awarded Certificate of Excellence in the field of Hernia and Bariatric Surgery by the following societies:

- Asia Pacific Hernia Society (APHS)
- Hernia Society of India (HSI)
- Obesity and Metabolic Surgery Society of India (OSSSI)
- Surgical Review Corporation (SRC-USA)

Apart from being at the forefront of best practices in Minimal Access surgery, our department caters to very high volumes of Minimal Access surgeries of over 300 patients per month. The immense variety, complexity, and large volume of surgeries conducted in our teaching hospital have enabled me to gain proficiency, augmented my expertise, and provided a broad-based experience.

A significant portion of the case content of my practice covers the full spectrum of upper G.I. surgery, with a sizeable predominance of Biliary procedures. Abdominal wall hernia surgery also forms an integral segment of my case listings. In 2003, I started my Bariatric Surgical practice, and today, it constitutes a significant portion of my case index. Furthermore, I also perform other routine General surgical procedures. My keen interest and major expertise lie predominantly in the field of Bariatric and Hernia procedures, resulting in their natural preponderance in my case profile. In my effort to be progressive and include innovative newer techniques, I have been practicing Robotic Surgery in various procedures since 2021.

Additionally, our Institute is an accredited teaching facility for the Fellowship program in Minimal Access Surgery. The course is conducted by The National Board of Examination, an autonomous body under the Ministry of Health and Family Welfare, Govt. of India. I have been a teaching Faculty member and examiner for the fellowship program since its inception in 2003. My contribution as a member of the teaching Faculty extends to CME programs and surgical workshops held at the national and international levels. I have been involved actively with the Indian Association of Gastrointestinal Endosurgeons (IAGES), Hernia Society of India (HSI), Asia Pacific Hernia Society (APHS), Obesity and Metabolic Surgery Society of India (OSSSI), and Asia Pacific Metabolic and Bariatric Surgery Society (APMBSS) as a member and part of the Executive board.

I have a keen interest in academia which makes me participate in a number of educational activities. Some of these are listed below :
